Software developer with over 3 years of experience building mobile and web applications in the banking and fintech sectors. Transitioning into UX design to leverage technical expertise in crafting intuitive, user centered digital experiences. Skilled in translating requirements and wireframes into polished, user-friendly interfaces.

Experience

FDM Group | Software Development Consultant

Feb 2022 – June 2025

Client: Oversea-Chinese Banking Corporation (OCBC)

Jul 2023 – Apr 2025

Mobile Applications Developer

- Developed and maintained mobile applications using Typescript and Kotlin, for banking and onboarding services
- Translated wireframes and product requirements into high-fidelity, production-ready mobile interfaces
- Implemented multi-step application workflows based on product and design specifications
- Ensured accurate form validation, error handling, and edge-case management across user journeys
- Supported testing and deployment of new features, resolving usability and functional issues in collaboration with QA teams
- Supported ongoing enhancements to improve clarity, reliability and overall user experience
- Key Projects:
 - Apply Credit Card, Credit Line, ExtraCash Loans, Onshore Onboarding
 - Built and refined onboarding flows for new account creation and debit/credit card origination
 - Developed loan and credit application journeys with complex eligibility and verification steps
 - Integrated SingPass MyInfo to automate data retrieval, reducing manual user input and improving assessment efficiency
 - Implemented secure API integrations to ensure smooth application submissions and approval processes
- Tech Stack: React, Redux, Typescript, Kotlin, REST APIs

Client: DBS Digimarkets
Full Stack Developer

June 2022– June 2023

- Developed responsive web interfaces to display users' FX portfolio analysis and transaction history visualization
- Built and maintained responsive data tables and dashboards using AG Grid to improve readability and usability
- Optimized user interfaces to enhance data presentation and ensure smooth interaction with large datasets displayed
- Built and integrated RESTful APIs to support seamless data exchange
- Tech Stack: Java, Spring Boot, REST APIs, Kafka, Websocket

FDM Group | Software Development Training Program

Feb 2022 – May 2022

- Developed foundation in Java and Object-Oriented Programming (OOP)
- Built web applications using Spring Boot and RESTful APIs, integrating SQL database and MVC architecture
- Developed strong foundations in problem-solving, system design, and testing practices

Education

SINGAPORE INSTITUTE OF TECHNOLOGY

Aug 2018 - Aug 2021

BSc Electrical Engineering & Information Technology

Thesis: Machine Learning for Segmenting Microscopic Imagery of 2D Materials

SINGAPORE POLYTECHNIC

Apr 2014 – May 2017

Diploma in Engineering with Business

Key Skills & Certifications

Technical Skills: Figma, ReactJS, Redux, Typescript, Java, Kotlin, HTML, CSS

Certifications: Google UX Design Certificate (Coursera, 2025)
